**STATEMENT PURSUANT TO SECTION 102 OF THE COMPANIES ACT, 2013 IN RESPECT OF SPECIAL BUSINESS SET OUT IN THE NOTICE.****ITEM NO- 4**

The Board of Directors of the Company intends to maintain limit of such sum or sums of money from time to time as may be required for the purpose of the business of the Company, notwithstanding that the money to be borrowed together with the money already borrowed by the Company (apart from “temporary loans” as explained in section 180(1)(c) of the Companies Act, 2013 obtained by the Company in the ordinary course of business) may, at any time, exceed upto a sum of Rs. 100 Crore (Rupees One Hundred Crore only) over and above the aggregate paid up capital of the Company and its free reserve (that is to say reserve not set apart for any specific purpose) on such terms and conditions as the Board may consider necessary and expedient in their absolute discretion.

However, as per Sec 180(1) (c) of the Companies Act, 2013, the Board of Directors of a public company, shall not, except with the consent of the shareholders by a Special Resolution, borrow money, where the moneys to be borrowed, together with the moneys already borrowed by the Company (apart from temporary loans obtained from the Company’s bankers in the ordinary course of business) will exceed the aggregate of paid-up capital of the Company and its free reserves.

Since funds are continuous requirement of an organization and capital is base component of any project, keeping in view of broad-based operations of the Company, its enhanced capital requirement and for its operational efficiency, the Board recommends the resolution set forth in Item No. 4 for the approval of the Members as Special Resolution.

None of the Directors or Key Managerial Personnel or their relatives have any concern or interest, financial or otherwise, in passing of the said Resolution, except to the extent of their shareholding in the Company.

**ITEM NO- 5**

The Nomination and Remuneration Committee, in its meeting held on 26.08.2020 and the Board of Directors, in its meeting held on 26.08.2020, approved and recommended to shareholders for their approval, the payment of remuneration of Rs. 3,60,00,000/- (say Rupees Three Crores and Sixty Lakhs) per annum to Mr. Mukesh Kumar Aggarwal (holding DIN 00231651), the Managing Director of the Company for remainder of duration of his appointment as Managing Director up to May 15, 2021. The payment of remuneration was approved by the Board based on industry standards, work responsibilities handled by the Managing Director of the Company. His efforts are instrumental in converting the Company’s fortunes. With his vast experience in textile sector, the Board of Directors considered it to be desirable for approval of remuneration payable to him for his remaining tenure of appointment as Managing Director. Approval of the shareholders is sought for enhanced remuneration payable for the remaining period of existing appointment to Mr. Mukesh Kumar Aggarwal as Managing Director of the Company. Mr. Mukesh Kumar Aggarwal and his relatives shall be deemed to be concerned or interested in the resolution to the extent of remuneration payable to Mr. Mukesh Kumar Aggarwal under the resolution. ## COMPANY'S PERFORMANCE

The Covid-19 pandemic has adversely impacted exports and with second order impact on the domestic markets with both exports as well as domestic sales falling. The pandemic has affected the majority of India's export market (the US and EU together constitute for approximately, 60% of the total apparel exports from India in value terms), causing order cancellations/deferral of order leading to inventory build-up and expectation of slower realization of export receivables leading to higher working capital requirements.

However, during the year under review, the Company has achieved net sales of Rs. 17,885.18 lakhs and a net profit before tax of Rs. 3,026.96 lakhs as against net sales of Rs. 15,674.66 lakhs and profit before tax of Rs. 2,716.81 lakhs in the previous financial year 2018-19 respectively.

Your Company is financially strong & self reliant in terms of funds generation and debt servicing. A constant rise in turnover of the Company is apparent. However, your Directors are expecting better results both in terms of operations of the Company & its financial position.

## DIVIDEND

In order to conserve the resources, your Board has decided not to declare any dividend for financial year 2019-20.

## TRANSFER TO RESERVES

Your Company does not propose to transfer amounts to the general reserve out of the amount available for appropriation.

## LISTING WITH STOCK EXCHANGES

The Company confirms that it has paid the Annual Listing Fees for the year 2019-20 to National Stock Exchange of India Limited and BSE Limited where the Company's Shares are listed.

## CORPORATE GOVERNANCE AND SHAREHOLDERS INFORMATION

## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. India's textile and apparel exports stood at US\$ 38.70 billion in FY19 and is expected to increase to US\$ 82.00 billion by 2021 from US\$ 22.95 billion in FY20 (up to November 2019).

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital-intensive sophisticated mills sector at the other end of the spectrum. The decentralized power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

### Market Size

In fact, it is the biggest employment generator after agriculture. It provides direct employment to 4.5 crore people and another 6 crores in allied sectors. Furthermore, India is the second-largest manufacturer of textiles and clothing in the world. India is also the second-largest exporter of textiles and apparel. In fact, it has a share of 5% in global trade.

### Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.41 billion from April 2000 to December 2019.

### COVID-19 Impact

The textile and clothing industry employees over 105 million people. It earns around the US \$40 billion forexes, apart from substantial revenue under GST and other taxes. The Indian textile industry has taken a major hit due to COVID-19. This is because most of the Indian yarn exports are to China. The agency assumes that India's exports will be substantially hit till FY 2021. In fact, it has already reduced by more than 40% until January 2020 due to the US-China trade war.

The majority of downstream players had to incur inventory losses due to the ongoing geopolitical tensions in crude oil. This further lead to the prices declining by more than 40% month on month in March 2020.

The fabric industry registered a marginal improvement in exports in during the year. This was coupled with lower raw material costs and increased export demand from Bangladesh and other countries. Indian ready-made garments players have been hoping of a revival in demand and shift of orders from China since the start of a pandemic. However, with the spread of corona virus in Europe, demand and orders have been reduced from major retailers. Due to the pandemic impact on consumer behavior and habits, "online-sales" are expected to witness a significant surge, even after the industry recovers.

### Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiatives taken by Government of India are:

- Under Union Budget 2020-21, a National Technical Textiles Mission is proposed for a period from 2020-21 to 2023-24 at an estimated outlay of Rs 1,480 crore (US\$ 211.76 million).
- In 2020, New Textiles Policy 2020 is expected to be released by the Ministry of Textiles.
- CCEA approved mandatory packaging of food grains and sugar in jute material for the Jute Year 2019-20.
- In September 2019, textile exports witnessed an increase of 6.2 per cent post GST as compared to period pre-GST.
- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for two subsectors of Textiles Industry - Readymade garments and Made ups - from two per cent to four per cent.
- As of August 2018, the Government of India has increased the basic custom duty to 20 per cent from 10 per cent on 501 textile products, to boost Make in India and indigenous production.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunity and attract investments worth Rs 80,000 crore (US\$ 11.93 billion) during 2018-2020. As of August 2018, it generated additional investments worth Rs 25,345 crore (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854. 42 million).
- The Government of India has taken several measures including Amended Technology Up-gradation Fund Scheme (A-TUFS), scheme is estimated to create employment for 35 lakh people and enable investments worth Rs 95,000 crore (US\$ 14.17 billion) by 2022.
- Integrated Wool Development Programme (IWDP) approved by Government of India to provide support to the wool sector starting from wool rearer to end consumer which aims to enhance the quality and increase the production during 2017-18 and 2019-20.

- The Cabinet Committee on Economic Affairs (CCEA), Government of India has approved a new skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore (US\$ 202.9 million) from 2017-18 to 2019-20. As of August 2019, 16 states have signed pacts with the Ministry of Textiles to partner with it for skilling about four lakh workers under the scheme.

#### Road Ahead

- The future for the Indian textile industry looks promising, a short term impact due to COVID-19 Pandemic will be faced by the textile industry in India also but it is expected to gain field soon with rise in domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. It is expected that the same trend will continue to follow in the coming years.

#### Hits and Misses

##### Hits

- India retains the position of 5th largest exporter of textile and apparel in 2019-20.
- India is the second-largest manufacturer of textiles and clothing in the world.
- India is also the second-largest exporter of textiles and apparel. In fact, it has a share of 5% in global trade.
- India has a presence of entire textile value chain from fibre to fashion.
- India is quickly emerging as a leader in supply of medical-textile as the industry has scaled up manufacturing PPE Kits and face masks and exporting the kits globally.
- India is among the top cotton producing countries with a share of 25% in global cotton production
- India is the largest producer of cotton yarn in the world.
- Average wages are 50-60% lower than in developed countries.
- Design and fashion sense ensure Indian players are well placed to strengthen business with global retailers.

##### Misses

- The sector largely has small-scale units and is labour intensive.
- Low cotton yield as compared other major cotton producing countries like China
- Volatility in the Cotton prices.
- High and increasing domestic prices of Staple Fibre restricts the growth of downstream segments in the Textile Value Chain.
- Inverted duty structure on Manmade Fibre based textiles, leading to accumulation of input-tax credit
- Higher production cost as compared to competing countries like Bangladesh, Vietnam etc.
- Declining exports of cotton yarn and apparel
- Absence of scheme for refund of center and state taxes and levies on yarn and fabric exports
- Duty structure favors import of apparel than of raw cloth than could have been turned into value-added garments.
- Indian exporters have duty disadvantage in comparison with its competitors like Bangladesh, Sri Lanka, Vietnam etc. which reduces the competitiveness of Indian textile and apparel exports in international market

#### Opportunities and Threats

##### Opportunities

- Rich heritage of the presence of entire textile value chain.
- Expected growth in consumer market in per capita spending and consumption
- Company & top management focus shifting to branded, value added garments.
- Basic infrastructure to grow at very high rates
- Listed and well recognized in stock markets - huge opportunity for multiplying wealth as branded garments enjoy high P/E multiples today.

##### Threats

- More dependence on cotton
- Fluctuating and declining cotton production

- Declining margins of the spinning industry (decreasing gap between cotton yarn and cotton prices)
- Low level of productivity in garment sector
- Banks tightening norms and increasing rates
- High debt levels
- Negligible growth of Textiles & Clothing industry
- Current management pool getting old, less aggressive & hungry

## INDEPENDENT AUDITOR'S REPORT

### TO THE MEMBERS OF SPL INDUSTRIES LIMITED

#### Report on the Audit of standalone Financial Statements Report on the audit of Financial Results

#### Opinion

We have audited the accompanying Standalone financial statements of SPL INDUSTRIES LIMITED ("The Company") which comprises the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), statement of changes in equity, statement of cash flows for the year ended on that date, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and its profit, changes in equity and its cash flows for the year ended on that date.

#### Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key Audit Matters

Key Audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. We invite attention to Note No. 50(v) to the stand alone financial results regarding uncertainties arising due to the outbreak of COVID 19 pandemic and the assessment made by the management on its business and financials, including valuation of assets, policy, liabilities and solvency for the year ended March 31, 2020, this assessment and outcome of the pandemic is as made by the management and is highly dependent on circumstances as they evolve in the subsequent periods.
2. Due to outbreak of COVID 19 pandemic and consequent restrictions carrying out audit physically at auditee premises and limitations on physical access to audit records, the audit procedures have been modified and we conducted audit through remote locations by accessing the audit records through electronic modes and making enquiries and collecting evidence through emails, phone/ conference calls.

#### Responsibility of Management for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Company's Board of Directors are also responsible for overseeing the company's financial reporting process.

#### Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A", a statement on the matters specified in paragraph 3 and 4 of the Order, to the extent applicable.

## Annexure – B to the Independent Auditor’s Report

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of SPL INDUSTRIES LIMITED (“the Company”) as of March 31, 2020 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

### Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

### Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered of India.

39 SEGMENT REPORTING

The Segment reporting of the Company has been prepared in accordance with IND AS-108, "Operating Segment" (Specified Under section 133 of the companies Act 2013, read with Rule 7 of Companies (Accounts) Rules 2015). For management purposes, the company is organized into business units based on its products and services and has two reportable segments as follows:-

(a) Manufacturing cotton knitted garments and made ups and Processing Charges b) Trading of garments

Segments have been identified as reportable segments by the Company chief operating decision maker ("CODM"). Segment profit amounts are evaluated by the board, which has been identified as the CODM, in deciding how to allocate resources and in assessing performance.

Segments Revenue, Results, Assets and Liabilities include the respective amounts identifiable to each of the segments and amount allocated on a reasonable basis. Unallocated expenditure consists of common expenditure incurred for all the segments and expenses incurred at corporate level. The assets and liabilities that cannot be allocated between the segments are shown as unallocated corporate assets and liabilities respectively.

The accounting policies of the reportable segments are the same as the Company's accounting policies described in Note 3. Segment profit (Earnings before interest, depreciation and amortization, and tax) amounts are evaluated regularly by the Board that has been identified as its CODM in deciding how to allocate resources and in assessing performance. The Company financing (Including finance costs and finance income) and income taxes are reviewed on an overall basis and are not allocated to operating segments.

**Fair Value Hierarchy**

The table shown below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined below:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

The fair value of the financial assets and liabilities are included at the amount that would be received to sell an asset and paid to transfer a liability in an orderly transaction between market participants. The following methods and assumptions were used to estimate the fair values:

Other non-current financial assets and liabilities: Fair value the carrying value as considered to approximate to fair value.

Derivative financial assets/liabilities: The Company enters into derivative contracts with various counterparties, principally financial institutions. Forward foreign currency contracts are valued using valuation techniques with market observable inputs. The most frequently applied valuation techniques for such derivatives include forward pricing using present value calculations, foreign exchange spot and forward premium rates.

However, company did not enter into any forward contract during the FY 2019-20 & FY 2018-19\

There has been no transfer between level 1 and level 2 during the above periods

NOTES ON FINANCIAL STATEMENTS FOR THE YEAR ENDED 31<sup>ST</sup> MARCH, 2020

48 Financial risk management objectives and policies

The Company's activities expose it to the following risks:

- a) Credit risk
- b) Liquidity risk
- c) Market risk

**a) Credit Risk**

Credit risk is the risk that counter party will not meet its obligations under a financial instruments or customer contract leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

i) Trade receivables

Customer credit risk is managed by the Company subject to the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and major customers are generally secured by obtaining other forms of credit insurance. The maximum exposure to credit risk at the reporting date is the carrying value of trade receivable disclosed in Note 10.

ii) Financial instrument and cash deposit

Credit risk is limited as the Company generally invest in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies. Counterparty credit limits are reviewed by the Company periodically and the limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

**b) Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically the Company ensures that it has sufficient cash on demand to meet expected short term operational expenses. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans/internal accruals.

**c) Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and foreign currency risk. Financial instruments affected by market risk include borrowings, trade receivable and trade payable.

Interest rate risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in market interest rates. The Company does not have significant debt obligations with floating interest rates, hence, is not exposed to any significant interest rate risk.

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company having a foreign currency risk majorly for trade receivables. The company mitigate the forex risk in relation to trade receivables by entering into the derivative instrument i.e forward sale contract.

**48.1 Foreign currency risk management**

The company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The carrying amount of the company foreign currency dominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

Particulars	Rounded off to Nearest Lakhs

## 48.2 Foreign currency sensitivity analysis

The Company is mainly exposed to the currency : USD

The following table details the Company's sensitivity to a 5% increase and decrease in the INR against the relevant foreign currencies. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. This is mainly attributable to the exposure outstanding on receivables and payables in the Company at the end of the reporting period. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% change in foreign currency rate. A positive number below indicates an increase in the profit or equity where the INR strengthens 5% against the relevant currency. For a 5% weakening of the INR against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

**Impact on Profit/(Loss)/ Total Equity**

Particulars	As at March31, 2020	As at March31, 2019
Increase in Exchange Rate by 5%	91.54	58.49
Decrease in Exchange Rate by 5%	-91.54	-58.49

## 49 Capital management

The Company's objective is to maintain a strong capital base to ensure sustained growth in business. The Capital Management focusses to maintain an optimal structure that balances growth and maximizes shareholder value.

The Company is predominantly equity financed. Further, the Company has sufficient cash, cash equivalents, current investments and financial assets which are liquid to meet the debts.

## 50 Critical estimates and judgements in applying accounting policies

The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Information about estimates and judgements made in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are as follows:

i) **Property, plant and equipment and useful life of property, plant and equipment and intangible assets**

The carrying value of property, plant and equipment is arrived at by depreciating the assets over the useful life of assets. The estimate of useful life is reviewed at the end of each financial year and changes are accounted for prospectively.

ii) **Provisions and contingencies**

The assessments undertaken in recognising provisions and contingencies have been made in accordance with the applicable Ind AS. A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Where the effect of time value of money is material, provisions are determined by discounting the expected future cash flows. The Company has significant capital commitments in relation to various capital projects which are not recognized on the balance sheet. In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Guarantees are also provided in the normal course of business. There are certain obligations which management has concluded, based on all available facts and circumstances, are not probable of payment or are very difficult to quantify reliably, and such obligations are treated as contingent liabilities and disclosed in the notes but are not reflected as liabilities in the financial statements. Although there can be no assurance regarding the final outcome of the legal proceedings in which the Company involved, it is not expected that such contingencies will have a material effect on its financial position or profitability (Refer Note 40 and 41)

iii) **Defined benefit plan**

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual

developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality table. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates. (Refer note no. 31)

iv) **Taxes**

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Deferred tax assets on unabsorbed depreciation/business loss have been recognised to the extent of deferred tax liabilities on taxable temporary differences available. It is expected that any reversals of the deferred tax liability would be offset against the reversal of the deferred tax assets. The Company has determined that it cannot recognise deferred tax assets on the tax losses carried forward as it is not probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Further details on taxes are disclosed in note no 35.

(v) **Estimates relating to Pandemic from COVID-19**

In light of the circumstances developed due to COVID-19 as declared as global pandemic by the World Health Organisation, the company has considered the possible effects that may result from COVID-19 on the carrying amount of financial assets, inventory, receivables, property plant and equipment etc. as well as liabilities accrued. On the basis of detailed review of all factors, the company expects the carrying amounts of these assets will be recovered and there is no significant impact on liabilities accrued. Due to nationwide lockdown from 25th March 2020, the Company's production got temporarily disrupted. Due to COVID-19 there is adverse impact on world economy and business and therefore the demand for garments would also be expected to be adversely affected in near future, which may impact Company's future export orders and profitability. The correct estimates of such adverse impacts can't be ascertained due to uncertainties involved.

## Note -Significant Accounting Policies

### 1 General Information

The company was incorporated on December 6, 1991 in India. The company is a garment manufacturing company and majorly deals in exports however during the year, value of exports are INR 10880.01 Lacks and further company has domestic sales and processing income during the year.

### 2 Basis of preparation of financial statements

#### a) 2.1 Basis Of Preparation and compliance with Ind AS

The financial statements of the company have been prepared in accordance with Indian Accounting Standards (Ind-AS) notified under the Companies (Indian Accounting Standards) Rules, 2015.

For all periods up to and including the year ended 31 March 2020, the Company prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013, read together with Rule 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP). The financial statements for the year ended 31 March 2018 was the first year when the company prepared its financials in accordance with Ind AS.

The financial statements have been prepared on the historical cost basis, except for certain financial instruments (refer accounting policy regarding financial instruments), which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services as at the date of respective transactions.

#### b) Basis of measurement

The Ind AS Financial Statements have been prepared on a going concern basis using historical cost convention and on an accrual method of accounting, except for certain financial assets and liabilities, including derivative financial instruments which have been measured at fair value as described below and defined benefit plans which have been measured at actuarial valuation as required by relevant Ind ASs.

#### Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Fair value for measurement and /or disclosure purpose in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

With effect from April 1, 2019, the Company adopted Ind-AS 116 - Leases. The effect on adoption of Ind-AS 116 is insignificant on the financial statements.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

#### c) Functional and presentation currency

These Ind AS Financial Statements are prepared in Indian Rupee which is the Company's functional currency All financial information presented in Rupees has been rounded to the nearest lakhs with two decimals.

### 3 Significant Accounting Policies

The Company has applied following accounting policies to all periods presented in the Ind AS Financial Statement.

**a) Revenue Recognition**

Revenue is measured at the fair value of the consideration received or receivable, net of discounts, volume rebates, outgoing sales taxes and other indirect taxes excluding excise duty.

- i) Sales are recognised when the substantial risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract.
- ii) Processing Charges are recognised at the time of dispatch of goods to the customers and are net of trade discounts, rebates and sales taxes, etc.
- iii) Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.
- iv) Income from duty drawback is recognised on accrual basis, however Import licences under focus product scheme and other Export Incentive are recognised on accrual basis on acceptance of claim by the Government Authority.
- v) Dividend Income is recognised when right to receive is established.
- vi) Claim receivables are accounted for depending on the certainty of receipt and claims payable are accounted for at the time of acceptance."

**b) Property, Plant and Equipment**

**(i) Property, plant and equipment**

On transition to Ind-AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognised as at 1st April, 2015 measured as per the previous GAAP and use that carrying value as a deemed cost of property, plant and equipment

**(ii) Capital Work in Progress**

Capital work in progress, property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

The Company identifies and determines cost of each component/ part of Property, plant and equipment separately, if the component/ part has a cost which is significant to the total cost of the Property, plant and equipment and has useful life that is materially different from that of the remaining asset.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances and cost of assets not ready for use at the balance sheet date are disclosed under capital work-in-progress.

**(iii) Depreciation**

Assets in the course of development or construction and freehold land are not depreciated.

Other property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation commences when the assets are ready for their intended use.

Depreciation on all plant and machinery is provided on Written Down Value Method and on other fixed assets is provided on the basis of Straight Line Method. Depreciation has been provided on the basis of useful life of the assets and the manner as prescribed in Schedule II of The Companies Act 2013. Following useful life were used for calculating depreciation amount as per Schedule II of The Companies Act 2013:

Particulars	Useful Life (in Years)
Factory Building	30 Years
Plant & Machinery	15 Years
Electric Installation & Equipment	10 Years
General Laboratory Equipment	10 Years
Office Equipments	5 Years
Servers & Networks	6 Years
End User Devices (Computer)	3 Years
Furniture & Fixtures	10 Years
Motor Cycles	10 Years
Motor Buses	8 Years

When significant spare parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

c) **Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred. Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

d) **Impairment of financial assets**

**Financial assets (other than at fair value)**

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 ('Financial Instruments') requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. The Company provides for impairment upon the occurrence of the triggering event.

**Non-financial assets**

**Tangible and intangible assets**

Property, plant and equipment and intangible assets are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

e) **Financial instruments**

Financial assets and liabilities are recognised when the Company becomes a party to the contract that gives rise to financial assets and financial liabilities. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

**Cash and cash equivalents**

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

**Financial assets at amortised cost**

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through other comprehensive income**

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through profit or loss**

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are immediately recognised in statement of profit and loss.

**Financial liabilities**

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

#### **De-recognition of financial instruments**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

#### **Fair value of financial instruments**

In determining the fair value of its financial instruments, the Company uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period

For other fair value related disclosures **Refer note no 47.**

#### **Reclassification of financial assets**

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets and financial liabilities. For financial assets a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains or losses) or interest

#### **Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

For more information on financial instruments Refer note no 47

#### **f) Derivative financial instruments and hedge accounting**

##### **Initial recognition and subsequent measurement**

In order to hedge its exposure to foreign exchange, the Company enters into forward, futures and other derivative financial instruments. The Company does not hold derivative financial instruments for speculative purposes.

Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss.

#### **g) Cash and cash equivalents**

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

#### **h) Borrowing Costs**

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

**Current v/s Non-Current Classification**

Company presents assets and liabilities in balancesheet based on current/non current classification.

An asset is current when it is:

- \* Expected to be realised or intended to be sold or consumed in normal operating cycle
- \* Held primarily for the purpose of trading
- \* Expected to be realised within twelve months after the reporting period, or
- \* Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non current.

A liability is current when:

- \* It is expected to be settled in normal operating cycle
- \* It is held primarily for the purpose of trading
- \* It is due to be settled within twelve months after the reporting period, or
- \* There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Advance tax paid is classified as non current assets.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

**i) Inventories**

Inventories are valued at lower of cost or net realizable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overhead incurred in bringing them to their respective present location and condition. Cost of raw materials, process chemicals, stores and spares, packing material, trading and other products are determined on First in First out (Weighted Average) method. Scrap is valued at net realizable value.

**j) Taxation****Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

**Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences, except when it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

**Sales/value added. Taxes/GST paid on acquisition of assets or on incurring expenses**

Expenses and assets are recognised net of the amount of sales/ value added taxes/GST paid, except:

When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

**k) Employee benefit schemes**

**(i) Short-term employee benefits**

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee benefits. These benefits include salaries and wages, performance incentives and compensated absences which are expected to occur in next twelve months. The undiscounted amount of short-term employee benefits to be paid in exchange for employee services is recognised as an expense as the related service is rendered by employees.

**Compensated absences:**

The cost of short term compensated absences are provided for based on estimates. Long term compensated absence costs are provided for based on actuarial valuation using the project unit credit method. The Company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

**Gratuity**

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the balance sheet date. The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income. In accordance with Ind AS, re-measurement gains and losses on defined benefit plans recognized in OCI are not to be subsequently reclassified to statement of profit and loss. As required under Ind AS compliant Schedule III, the Company transfers it immediately to retained earnings.

**Provident Fund**

Eligible employees of the Company receive benefits from a provident fund, which is a defined benefit plan. Both the eligible employee and the Company make monthly contributions to the provident fund plan equal to a specified percentage of the covered employee's salary.

**(ii) Termination benefits**

Termination benefits if any are recognised as an expense immediately

**l) Provision for liabilities and charges, Contingent liabilities and contingent assets**

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past event whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

Refer Note 40 & 41 for details.

**n) Foreign currency transactions**

In the financial statements of the Company, transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in other currencies are translated into the functional currency at exchange rates prevailing on the reporting date except for those whose provisions have already been booked. Non-monetary assets and liabilities denominated in other currencies and measured at historical cost or fair value are translated at the exchange rates prevailing on the dates on which such values were determined.

All exchange differences are included in the statement of profit and loss.

m) **Earnings per share**

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

n) **Segment Reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. Revenue and expenses are identified to segments on the basis of their relationship to the operating activities of the segment. Inter segment revenue are accounted for based on the cost price. Revenue, expenses, assets and liabilities which are not allocable to segments on a reasonable basis, are included under "Unallocated revenue/ expenses/ assets/ liabilities".

o) **Cash Flow Statement**

Cash flows are reported using indirect method as set out in Ind AS -7 "Statement of Cash Flows", whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

p) **Leases**

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

For arrangements entered into prior to 1 April 2016, the Company has determined whether the arrangement contains lease on the basis of facts and circumstances existing on the date of transition.

**Company as a lessor**

A lease is classified at the inception date as a operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease & a lease other than finance lease is operating lease.

Operating lease payments are recognised as an income in the statement of profit and loss on a straight- line basis over the lease term.

**Refer Note:-42 for disclosure**

q) **Use of Estimates and Judgments**

The preparation of the financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates under different assumptions and conditions.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are elaborated in note no. 50.

r) **Investment Property**

(i) **Recognition & Measurement**

Land or building held to earn rentals. An investment property is measured initially at its cost. The cost of an investment property comprises its purchase price and any directly attributable expenditure. After initial recognition, the company carries the investment property at the cost less accumulated depreciation and accumulated impairment, if any. The residual value, and the fair value of investment property is reviewed at least at each financial year end and, if expectations differ from previous estimates, the change(s) is accounted for as a change in an accounting estimate in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors.

(ii) **Depreciation**

Depreciation on Investment property is provided on Straight Line Value Method. Depreciation has been provided on the basis of useful life of the assets and the manner as prescribed in Schedule II of The Companies Act 2013.
